

Dramatica Variations by Quad with Corresponding Elements for PRCO/TKAD

S = Situation

A = Activity

FA = Fixed Attitude

M = Manipulation

Fact: belief in something real

- (S) Proven - a rating of knowledge based on corroboration
- (A) Accurate - being within tolerances
- (M) Unproven - a rating of knowledge that has not been tested
- (FA) Non-accurate - not within tolerances

Security: an evaluation of one's defenses and protections

- (S) Effect - the specific outcome forced by a cause
- (A) Result - the ramifications of a specific effect
- (M) Process - the mechanism through which a cause leads to an effect
- (FA) Cause - the specific circumstances that lead to an effect

Threat: an evaluation of potential negative forces

- (S) Theory - an unbroken chain of relationships leading from a premise to a conclusion
- (A) Expectation - a conclusion as to the eventual effect of a particular cause
- (M) Determination - a conclusion as to the cause behind a particular effect
- (FA) Hunch - a conclusion based on intuition

Fantasy: belief in something unreal

- (S) Trust - an acceptance of knowledge as proven without first testing its validity
- (A) Ending - coming to a conclusion
- (M) Unending - a continuance without cessation
- (FA) Test - a trial to determine something's validity

Work: applying oneself to something known to be within one's ability

- (S) Certainty - a conclusion that something is absolutely true
- (A) Deduction - a process of thought that determines certainty
- (M) Induction - a means of determining possibility
- (FA) Potentiality - a determination that something has the capacity to become true

Attraction: drawing or being drawn to something

- (S) Proaction - taking initiative action to achieve one's goals
- (A) Acceptance - a decision not to oppose

- (M) Non-acceptance - a decision to oppose
- (FA) Reaction - actions made in response

Repulsion: pushing or being pushed away from

- (S) Probability - a determination of likelihood
- (A) Reduction - a process of thought that determines probability
- (M) Production - a process of thought that determines potential
- (FA) Possibility - a determination that something might be true

Attempt: applying oneself to something not known to be within one's ability

- (S) Inaction - taking no action as a means of response
 - (A) Evaluation - an appraisal of a situation and/or circumstances
 - (M) Re-evaluation - a reappraisal of a situation or circumstances
 - (FA) Protection - an effort to prevent one's concerns from being vulnerable to interference
-

Openness: willingness to reevaluate

- (S) Consider - weighing pros and cons
- (A) Faith - accepting something as certain without proof
- (M) Disbelief - the belief that something is untrue
- (FA) Reconsider - questioning a conclusion based on additional information

Delay: putting off until later

- (S) Pursuit - a directed effort to resolve a problem
- (A) Support - an indirect assistance given to another's efforts
- (M) Oppose - an indirect detraction from another's effort
- (FA) Avoidance - stepping around, preventing or escaping from a problem rather than solving it

Choice: making a decision

- (S) Logic - a rational sense of how things are related
- (A) Conscience - forgoing an immediate benefit because of future consequences
- (M) Temptation - the urge to embrace immediate benefits despite possible consequences
- (FA) Feeling - an emotional sense of how things are going

Preconception: adhering to a previously held view; unwillingness to reevaluate

- (S) Control - a method based on organization and constraint
- (A) Help - a direct assistance to another's effort to achieve their goal
- (M) Hinder - a direct detraction from another's effort to achieve their goal
- (FA) Uncontrolled - a disorganized response

Fate: a future situation that will befall an individual

- (S) Knowledge - that which one holds to be true
- (A) Order - an arrangement in which patterns are seen
- (M) Chaos - random change or a lack of order
- (FA) Thought - the process of consideration

Prediction: a predetermination of a future state of affairs

- (S) Actuality - an objective reality -- the way things are
- (A) Inertia - a continuation of a state or process -- Inertia is a tendency to maintain the status quo.
- (M) Change - an alteration of a state or process
- (FA) Perception - the way things seem to be

Interdiction: an effort to change a predetermined course

- (S) Ability - being suited to handle a task; the innate capacity to do or be.
- (A) Equity - a balance, fairness, or stability -- Equity is balance
- (M) Inequity - an unbalance, unfairness, or lack of stability
- (FA) Desire - the motivation to change one's situation or circumstances

Destiny: the future path an individual must take

- (S) Aware - being conscious of things outside oneself
- (A) Projection - an extension of probability into the future
- (M) Speculation - an extension of possibility into the future
- (FA) Self-aware - being conscious of one's own existence

Approach: one's methodology of doing or being

- (S) Consider - weighing pros and cons
- (A) Logic - a rational sense of how things are related
- (M) Feeling - an emotional sense of how things are going
- (FA) Reconsider - questioning a conclusion based on additional information

Self Interest: doing or being based on what is best for oneself

- (S) Pursuit - a directed effort to resolve a problem
- (A) Control - a method based on organization and constraint
- (M) Uncontrolled - a disorganized response
- (FA) Avoidance - stepping around, preventing or escaping from a problem rather than solving it

Morality: doing or being based on what is best for others

- (S) Faith - accepting something as certain without proof
- (A) Conscience - forgoing an immediate benefit because of future consequences
- (M) Temptation - the urge to embrace immediate benefits despite possible consequences
- (FA) Disbelief - the belief that something is untrue

Attitude: demeanor or outlook

- (S) Support - an indirect assistance given to another's efforts
 - (A) Help - a direct assistance to another's effort to achieve their goal
 - (M) Hinder - a direct detraction from another's effort to achieve their goal
 - (FA) Oppose - an indirect detraction from another's effort
-

Prerequisites: the essential preliminaries that must be met

- (S) Certainty - a conclusion that something is absolutely true
- (A) Probability - a determination of likelihood
- (M) Possibility - a determination that something might be true
- (FA) Potentiality - a determination that something has the capacity to become true

Strategy: a plan to achieve one's purpose or a plan of response

- (S) Proaction - taking initiative action to achieve one's goals
- (A) Inaction - taking no action as a means of response
- (M) Protection - an effort to prevent one's concerns from being vulnerable to interference
- (FA) Reaction - actions made in response

Analysis: evaluation of the situation and/or circumstances

- (S) Deduction - a process of thought that determines certainty
- (A) Reduction - a process of thought that determines probability
- (M) Production - a process of thought that determines potential
- (FA) Induction - a means of determining possibility

Preconditions: restrictions imposed on an effort

- (S) Acceptance - a decision not to oppose
 - (A) Evaluation - an appraisal of a situation and/or circumstances
 - (M) Re-evaluation - a reappraisal of a situation or circumstances
 - (FA) Non-acceptance - a decision to oppose
-

Instinct: intrinsic unconditioned responses

- (S) Knowledge - that which one holds to be true
- (A) Ability - being suited to handle a task; the innate capacity to do or be.
- (M) Desire - the motivation to change one's situation or circumstances
- (FA) Thought - the process of consideration

Senses: sensory observations

- (S) Actuality - an objective reality -- the way things are
- (A) Aware - being conscious of things outside oneself
- (M) Self-aware - being conscious of one's own existence
- (FA) Perception - the way things seem to be

Interpretation: determination of possible meaning

- (S) Order - an arrangement in which patterns are seen
- (A) Equity - a balance, fairness, or stability -- Equity is balance
- (M) Inequity - an unbalance, unfairness, or lack of stability
- (FA) Chaos - random change or a lack of order

Conditioning: responses based on experience or training

- (S) Inertia - a continuation of a state or process -- Inertia is a tendency to maintain the status quo.
- (A) Projection - an extension of probability into the future
- (M) Speculation - an extension of possibility into the future
- (FA) Change - an alteration of a state or process

Wisdom: understanding how to apply Knowledge

- (S) Proven - a rating of knowledge based on corroboration
- (A) Theory - an unbroken chain of relationships leading from a premise to a conclusion
- (M) Hunch - a conclusion based on intuition
- (FA) Unproven - a rating of knowledge that has not been tested

Skill: aptitude or innate ability

- (S) Effect - the specific outcome forced by a cause
- (A) Trust - an acceptance of knowledge as proven without first testing its validity
- (M) Test - a trial to determine something's validity
- (FA) Cause - the specific circumstances that lead to an effect

Experience: the gaining of familiarity

- (S) Accurate - being within tolerances
- (A) Expectation - a conclusion as to the eventual effect of a particular cause

- (M) Determination - a conclusion as to the cause behind a particular effect
- (FA) Non-accurate - not within tolerances

Enlightenment: an understanding that transcends knowledge

- (S) Result - the ramifications of a specific effect
 - (A) Ending - coming to a conclusion
 - (M) Unending - a continuance without cessation
 - (FA) Process - the mechanism through which a cause leads to an effect
-

Knowledge: that which one holds to be true

- (S) Proven - a rating of knowledge based on corroboration
- (A) Result - the ramifications of a specific effect
- (M) Process - the mechanism through which a cause leads to an effect
- (FA) Unproven - a rating of knowledge that has not been tested

Ability: being suited to handle a task; the innate capacity to do or be.

- (S) Effect - the specific outcome forced by a cause
- (A) Accurate - being within tolerances
- (M) Non-accurate - not within tolerances
- (FA) Cause - the specific circumstances that lead to an effect

Desire: the motivation toward something better

- (S) Trust - an acceptance of knowledge as proven without first testing its validity
- (A) Expectation - a conclusion as to the eventual effect of a particular cause
- (M) Determination - a conclusion as to the cause behind a particular effect
- (FA) Test - a trial to determine something's validity

Thought: the process of consideration

- (S) Theory - an unbroken chain of relationships leading from a premise to a conclusion
 - (A) Ending - coming to a conclusion
 - (M) Unending - a continuance without cessation
 - (FA) Hunch - a conclusion based on intuition
-

Permission: what is allowed

- (S) Certainty - a conclusion that something is absolutely true
- (A) Acceptance - a decision not to oppose
- (M) Non-acceptance - a decision to oppose
- (FA) Potentiality - a determination that something has the capacity to become true

Need: that which is required

- (S) Proaction - taking initiative action to achieve one's goals
- (A) Deduction - a process of thought that determines certainty
- (M) Induction - a means of determining possibility
- (FA) Reaction - actions made in response

Expediency: most efficient course considering repercussions

- (S) Inaction - taking no action as a means of response
- (A) Reduction - a process of thought that determines probability
- (M) Production - a process of thought that determines potential
- (FA) Protection - an effort to prevent one's concerns from being vulnerable to interference

Deficiency: appraisal of what is lacking

- (S) Probability - a determination of likelihood
- (A) Evaluation - an appraisal of a situation and/or circumstances
- (M) Re-evaluation - a reappraisal of a situation or circumstances
- (FA) Possibility - a determination that something might be true

Rationalization: an alternative explanation used to mask the real reason

- (S) Consider - weighing pros and cons
- (A) Support - an indirect assistance given to another's efforts
- (M) Oppose - an indirect detraction from another's effort
- (FA) Reconsider - questioning a conclusion based on additional information

Commitment: a decision to stick with something regardless of the consequences

- (S) Pursuit - a directed effort to resolve a problem
- (A) Faith - accepting something as certain without proof
- (M) Disbelief - the belief that something is untrue
- (FA) Avoidance - stepping around, preventing or escaping from a problem rather than solving it

Responsibility: taking accepting or assuming control to the exclusion of others

- (S) Control - a method based on organization and constraint
- (A) Conscience - forgoing an immediate benefit because of future consequences
- (M) Temptation - the urge to embrace immediate benefits despite possible consequences
- (FA) Uncontrolled - a disorganized response

Obligation: accepting a task or situation in exchange for someone's earlier or potential favors

- (S) Logic - a rational sense of how things are related

- (A) Help - a direct assistance to another's effort to achieve their goal
 - (M) Hinder - a direct detraction from another's effort to achieve their goal
 - (FA) Feeling - an emotional sense of how things are going
-

State of Being: one's true nature

- (S) Knowledge - that which one holds to be true
- (A) Inertia - a continuation of a state or process -- Inertia is a tendency to maintain the status quo.
- (M) Change - an alteration of a state or process
- (FA) Thought - the process of consideration

Situation: a logistic assessment of one's environment

- (S) Actuality - an objective reality -- the way things are
- (A) Order - an arrangement in which patterns are seen
- (M) Chaos - random change or a lack of order
- (FA) Perception - the way things seem to be

Circumstances: an emotional assessment of one's environment

- (S) Aware - being conscious of things outside oneself
- (A) Equity - a balance, fairness, or stability -- Equity is balance
- (M) Inequity - an unbalance, unfairness, or lack of stability
- (FA) Self-aware - being conscious of one's own existence

Sense of Self: one's perception of oneself

- (S) Ability - being suited to handle a task; the innate capacity to do or be.
 - (A) Projection - an extension of probability into the future
 - (M) Speculation - an extension of possibility into the future
 - (FA) Desire - the motivation to change one's situation or circumstances
-

Value: the objective usefulness of something in general

- (S) Proven - a rating of knowledge based on corroboration
- (A) Effect - the specific outcome forced by a cause
- (M) Cause - the specific circumstances that lead to an effect
- (FA) Unproven - a rating of knowledge that has not been tested

Confidence: belief in the accuracy of expectations

- (S) Theory - an unbroken chain of relationships leading from a premise to a conclusion
- (A) Trust - an acceptance of knowledge as proven without first testing its validity

- (M) Test - a trial to determine something's validity
- (FA) Hunch - a conclusion based on intuition

Worry: concern for the future

- (S) Accurate - being within tolerances
- (A) Result - the ramifications of a specific effect
- (M) Process - the mechanism through which a cause leads to an effect
- (FA) Non-accurate - not within tolerances

Worth: a rating of usefulness or desirability to oneself personally

- (S) Expectation - a conclusion as to the eventual effect of a particular cause
 - (A) Ending - coming to a conclusion
 - (M) Unending - a continuance without cessation
 - (FA) Determination - a conclusion as to the cause behind a particular effect
-

Closure: bringing something to an end or to completion

- (S) Consider - weighing pros and cons
- (A) Pursuit - a directed effort to resolve a problem
- (M) Avoidance - stepping around, preventing or escaping from a problem rather than solving it
- (FA) Reconsider - questioning a conclusion based on additional information

Hope: a desired future that falls within reasonable expectations

- (S) Logic - a rational sense of how things are related
- (A) Control - a method based on organization and constraint
- (M) Uncontrolled - a disorganized response
- (FA) Feeling - an emotional sense of how things are going

Dream: a desired future that does not fall within reasonable expectations

- (S) Faith - accepting something as certain without proof
- (A) Support - an indirect assistance given to another's efforts
- (M) Oppose - an indirect detraction from another's effort
- (FA) Disbelief - the belief that something is untrue

Denial: the refusal to admit to oneself or others that a previously held view is no longer true

- (S) Conscience - forgoing an immediate benefit because of future consequences
- (A) Help - a direct assistance to another's effort to achieve their goal
- (M) Hinder - a direct detraction from another's effort to achieve their goal
- (FA) Temptation - the urge to embrace immediate benefits despite possible consequences

Investigation: gathering evidence to resolve questions of validity

- (S) Certainty - a conclusion that something is absolutely true
- (A) Proaction - taking initiative action to achieve one's goals
- (M) Reaction - actions made in response
- (FA) Potentiality - a determination that something has the capacity to become true

Appraisal: a limited initial assessment

- (S) Probability - a determination of likelihood
- (A) Inaction - taking no action as a means of response
- (M) Protection - an effort to prevent one's concerns from being vulnerable to interference
- (FA) Possibility - a determination that something might be true

Reappraisal: reconsideration of a previous determination

- (S) Deduction - a process of thought that determines certainty
- (A) Acceptance - a decision not to oppose
- (M) Non-acceptance - a decision to oppose
- (FA) Induction - a means of determining possibility

Doubt: questioning validity without investigating to be sure

- (S) Reduction - a process of thought that determines probability
- (A) Evaluation - an appraisal of a situation and/or circumstances
- (M) Re-evaluation - a reappraisal of a situation or circumstances
- (FA) Production - a process of thought that determines potential

Truth: that which is actually correct

- (S) Knowledge - that which one holds to be true
- (A) Actuality - an objective reality -- the way things are
- (M) Perception - the way things seem to be
- (FA) Thought - the process of consideration

Evidence: information supporting a belief

- (S) Ability - being suited to handle a task; the innate capacity to do or be.
- (A) Aware - being conscious of things outside oneself
- (M) Self-aware - being conscious of one's own existence
- (FA) Desire - the motivation to change one's situation or circumstances

Suspicion: questioning or forming a belief based on new evidence

- (S) Order - an arrangement in which patterns are seen

- (A) Inertia - a continuation of a state or process -- Inertia is a tendency to maintain the status quo.
- (M) Change - an alteration of a state or process
- (FA) Chaos - random change or a lack of order

Falsehood: that which has been shown to be erroneous

- (S) Equity - a balance, fairness, or stability -- Equity is balance
- (A) Projection - an extension of probability into the future
- (M) Speculation - an extension of possibility into the future
- (FA) Inequity - an unbalance, unfairness, or lack of stability
